VEERESH MALLIKARJUN KAKAMARI

Belagavi, Karnataka, India

veereshkakamari@gmail.com | +91 9113612840 | GitHub: VeereshMK-07 | LinkedIn: veeresh-kakamari/

SUMMARY

Motivated Full-Stack Developer with strong foundational skills in building scalable web applications using React.js, Node.js, and MongoDB. Experienced in developing real-world projects including a trading platform and travel listing system, with a focus on clean UI, performance optimization, and problem-solving. Eager to contribute and grow in a dynamic software development environment.

PROJECTS

Zerodha-Inspired Trading Platform (Desktop-first optimized interface)

Live: https://zerodha-frontend-dzxz.onrender.com
GitHub: https://github.com/VeereshMK-07/zerodha-frontend

Tech: React.js, Node.js, Express.js, MongoDB, REST APIs

- Developed a stock trading platform with interactive dashboard and simulated buy/sell functionality
- Implemented secure OTP-based authentication to enhance login security
- Designed a one-click demo login feature, reducing recruiter onboarding time by ~80%
- Built modular React components for portfolio tracking and transaction updates
- Structured application into separate frontend, backend, and dashboard services for scalability
- Optimized UI performance and state handling for smooth user experience
- Improved data visualization and usability through a desktop-first optimized interface

Wanderlust – Full-Stack Travel Listing Platform

Live: https://wander-lust-uyrf.onrender.com/listings
GitHub: https://github.com/VeereshMK-07/WanderLust

Tech: Node.js, Express.js, MongoDB, EJS, Leaflet.js, Bootstrap

- Built a full-stack travel listing platform with map-based property discovery using Leaflet.js
- Developed RESTful APIs for managing listings, reviews, and user data
- Implemented authentication using cookie-based session management
- Implemented search and filtering system, improving user search efficiency by ~40%
- Designed a fully responsive UI across mobile, tablet, and desktop devices
- Optimized backend queries and loading performance, reducing load time by ~30%
- Deployed application on Render for public access

EXPERIENCE

Frontend Developer Intern (Team Project)
Varcons Technologies Pvt. Ltd. | Sep 2024 – Jan 2025 | Bangalore, India

- Worked as part of a team to develop an LMS-based college rating platform
- Focused on frontend development, building responsive UI components and improving usability
- Collaborated with backend and design teams to enhance overall user experience
- Assisted in optimizing application performance and improving interaction flow

EDUCATION

Bachelor of Engineering (B.E) – Computer Science
Visvesvaraya Technological University (VTU), Belagavi | Graduated: June 2025
CGPA: 7.87 / 10

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design
Backend: Node.js, Express.js, Flask, REST APIs
Database: MongoDB, MySQL, Firebase
Tools: Git, GitHub, Postman, Render
Concepts: Authentication (OTP, Sessions), MVC Architecture, API Design, State Management, JSON, HTTP

CERTIFICATIONS

- Full-Stack Development Internship – Varcons Technologies Pvt. Ltd.
- Software Engineering Job Simulation – Goldman Sachs (Forage)
- Scientific Computing with Python – freeCodeCamp
